

## **Data Scientist**

FinLocker is a leading financial data and analytics company. We focus on analyzing consumer financial data such as assets, income, employment, taxes, credit, liabilities, real estate and more. You will be responsible for designing and implementing the models and analyses for the function of a “virtual financial advisor” for the consumer.

Our office is located in Clayton, MO with remote employees throughout the US.

This is a full-time position that will be based in our Clayton (St. Louis) office.

Salary is competitive to relevant experience.

### **Key Qualifications:**

- 6+ years’ experience of applying machine learning techniques, optimization, and statistics to drive key decisions
- Extensive hands-on experience with development of predictive models and machine learning/AI-based solutions
- Solid programming skills in Python, R or similar data science language
- Advanced proficiency in data visualization
- Prefer financial services industry experience
- Prefer experience in CRM, financial analysis, financial advisory
- Bachelors or Master’s degree in Computer Science, Math, Data Science, or Statistics
- Be a United States citizen
